Check out the results. Bureau of Labor Statistics Occupational Outlook Handbook "Employment in architecture and engineering occupations is projected to grow 6 percent from 2020 to 2030. Employment is projected to grow about as fast as the average for all occupations, although growth will vary by specialty; overall job opportunities for engineers are expected to be good. A bachelor's degree in engineering is required for most entry-level jobs, but some research positions may require a graduate degree. Starting salaries are among the highest of all college graduates." Read Outlook Handbook PayScale College Salary Report "It's no surprise that STEM (science, technology, engineering and math) majors are the top college majors by salary, but that doesn't mean that we discourage students from studying majors in the humanities, social sciences, education or arts. In fact, some of those majors lead to high-paying careers as well—it just often takes a longer time for those graduates to reach their prime earning potential."
